Key features

• High expandability for investment protection
• Premium resiliency and integrated management
• SDN readiness with OpenFlow support
• Fully featured IPv4/IPv6 dual stack
• 1,440 W of PoE+ power using dual power supplies for high resiliency

Product overview

The HP 5500 HI Switch Series comprises Gigabit Ethernet switches that deliver outstanding resiliency, security, and multiservice support capabilities at the edge layer of data center, large campus, and metro Ethernet networks. The switches can also be used in the core layer of SMB networks.

With Intelligent Resilient Framework (IRF) support and available dual power supplies, the HP 5500 HI Switch Series can deliver the highest levels of resiliency and manageability. In addition, the PoE+ models provide up to 1,440 W of PoE+ power with the dual power supply configuration.

Designed with two fixed 10GbE ports and extension module flexibility, these switches can provide up to six 10GbE uplink or 70GbE ports. With complete IPv4/IPv6, OpenFlow, and MPLS/VPLS features, the series provides investment protection with an easy transition from IPv4 to IPv6 networks.
Features and benefits

Software-defined networking

• OpenFlow
  Supports OpenFlow 1.3 specification to enable SDN by allowing separation of the data (packet forwarding) and control (routing decision) paths

Quality of Service (QoS)

• Advanced classifier-based QoS
  Classifies traffic using multiple match criteria based on Layer 2, 3, and 4 information; applies QoS policies such as setting priority level and rate limit to selected traffic on a per-port or per-VLAN basis

• Traffic policing
  Supports Committed Access Rate (CAR) and line rate

• Powerful QoS feature
  Creates traffic classes based on access control lists (ACLs), IEEE 802.1p precedence, IP, and DSCP or Type of Service (ToS) precedence; supports filter, redirect, mirror, or remark; supports the following congestion actions: strict priority (SP) queuing, weighted round robin (WRR), weighted fair queuing (WFQ), weighted random early discard (WRED), weighted deficit round robin (WDRR), SP+WDRR, and SP+WFQ

• Storm restraint
  Allows limitation of broadcast, multicast, and unknown unicast traffic rate to reduce unwanted broadcast traffic on the network

Management

• Friendly port names
  Allow assignment of descriptive names to ports

• sFlow® (RFC 3176)
  Provides scalable ASIC-based wire-speed network monitoring and accounting with no impact on network performance; this allows network operators to gather a variety of sophisticated network statistics and information for capacity planning and real-time network monitoring purposes

• Complete session logging
  Provides detailed information for problem identification and resolution

• Remote configuration and management
  Enable configuration and management through a Web browser with advanced security features or a CLI located on a remote device

• Manager and operator privilege levels
  Provide read-only (operator) and read/write (manager) access on CLI and Web browser management interfaces

• Management VLAN
  Segments traffic to and from management interfaces, including CLI/Telnet, a Web browser interface, and SNMP

• Command authorization
  Leverages RADIUS to link a custom list of CLI commands to an individual network administrator’s login; an audit trail documents activity
• Secure Web GUI
  Provides an easy-to-use graphical interface with advanced security features for configuring the module via HTTPS
• SNMPv1, v2c, and v3
  Facilitate centralized discovery, monitoring, and secure management of networking devices
• Remote monitoring (RMON)
  Uses standard SNMP to monitor essential network functions; supports events, alarm, history, and statistics group plus a private alarm extension group
• Remote intelligent mirroring
  Mirrors ingress/egress ACL-selected traffic from a switch port or VLAN to a local or remote switch port anywhere on the network
• In-Service Software Upgrade (ISSU)
  Enables operators to perform upgrades in the shortest possible amount of time with reduced risk to network operations or traffic disruptions

**Connectivity**
• Auto-MDIX
  Provides automatic adjustments for straight-through or crossover cables on all 10/100 and 10/100/1000 ports
• Packet storm protection
  Protects against broadcast, multicast, or unicast storms with user-defined thresholds
• Ethernet operations, administration, and maintenance (OAM)
  Detects data link layer problems that occurred in the “last mile” using the IEEE 802.3ah OAM standard; monitors the status of the link between two devices
• Flow Control
  Provides back pressure using standard IEEE 802.3x, reducing congestion in heavy traffic situations
• Fixed 10GbE ports
  Provide two fixed SFP+ ports for a 20GbE connection to the network without the need for additional extension interface modules
• Optional 10GbE ports
  Deliver, through the use of optional modules, additional 10GbE connections, which are available for uplinks or high-bandwidth server connections; flexibly support copper, XFP, SFP+, or CX4 local connections
• Optional eight-port SFP module
  Adds up to eight additional wire-speed Gigabit Ethernet ports for unprecedented Gigabit density in a single 1U enclosure
• Jumbo packet support
  Supports up to 12,288-byte frame size to improve the performance of large data transfers
• High-bandwidth CX4 local stacking
  Achieves 12 Gbps per connection when using local CX4 stacking, allowing for up to 96 Gbps total stacking bandwidth (full duplex) in a resilient stacking configuration
• IEEE 802.3at Power over Ethernet (PoE+)
  Provides up to 30 W per port that allows support for the latest PoE+-capable devices such as IP phones, wireless access points, and security cameras, as well as any IEEE 802.3af compliant end device; reduces the cost of additional electrical cabling and circuits that would otherwise be necessary in IP phone and WLAN deployments
**Performance**

- Hardware-based wire-speed access control lists (ACLs)
  
  Help provide high levels of security and ease of administration without impacting network performance with a feature-rich TCAM-based ACL implementation
- Nonblocking architecture
  
  Delivers up to 224 Gbps of wire-speed switching with a nonblocking switching fabric and up to 167 million pps throughput

**Resiliency and high availability**

- Separate data and control paths
  
  Separate control from services and keeps service processing isolated; increase security and performance
- Device Link Detection Protocol (DLDP)
  
  Monitors link connectivity and shuts down ports at both ends if unidirectional traffic is detected, preventing loops in STP-based networks
- Intelligent Resilient Framework (IRF)
  
  Creates virtual resilient switching fabrics, where two or more switches perform as a single L2 switch and L3 router; switches do not have to be co-located and can be part of a disaster-recovery system; servers or switches can be attached using standard LACP for automatic load balancing and high availability; can reduce the need for complex protocols like Spanning Tree Protocol, Equal-Cost Multipath (ECMP), or VRRP, thereby simplifying network operation
- Rapid Ring Protection Protocol (RRPP)
  
  Connects multiple switches in a high-performance ring using standard Ethernet technology; traffic can be rerouted around the ring in less than 50 ms, reducing the impact on traffic and applications
- Smart Link
  
  Allows 50 ms failover between links
- Virtual Router Redundancy Protocol (VRRP)
  
  Allows groups of two routers to dynamically back each other up to create highly available routed environments
- IRF capability
  
  Provides single IP address management for a resilient virtual switching fabric of up to nine switches using up to 80 Gb/s links

**Manageability**

- Dual flash images
  
  Provide independent primary and secondary operating system files for backup while upgrading
- Multiple configuration files
  
  Allow multiple configuration files to be stored to a flash image
- IEEE 802.1AB Link Layer Discovery Protocol (LLDP)
  
  Facilitates easy mapping using network management applications with LLDP automated device discovery protocol
- Troubleshooting
  
  Allows ingress and egress port monitoring, enabling network problem solving; virtual cable tests provide visibility into cable problems
- IPv6 management
  
  Future-proofs networking, as the switch is capable of being managed whether the attached network is running IPv4 or IPv6; supports pingv6, tracertv6, Telnetv6, TFTPv6, DNSv6, and ARPv6
**Layer 2 switching**
- GARP VLAN Registration Protocol
  Allows automatic learning and dynamic assignment of VLANs
- IP multicast snooping and data-driven IGMP
  Automatically prevents flooding of IP multicast traffic
- Internet Group Management Protocol (IGMP) and Multicast Listener Discovery (MLD) protocol snooping
  Control and manage the flooding of multicast packets in a Layer 2 network
- 32K MAC addresses
  Provide access to many Layer 2 devices
- IEEE 802.1ad QinQ and selective QinQ
  Increase the scalability of an Ethernet network by providing a hierarchical structure; connect multiple LANs on a high-speed campus or metro network
- 10Gbe port aggregation
  Allows grouping of ports to increase overall data throughput to a remote device
- Spanning Tree/MSTP, RSTP, and STP root guard
  Prevent network loops
- 32 MSTP instances
  Allow multiple configurations of STP per VLAN group
- Isolation at data link layer with private VLANs
  Provides, through a two-tier VLAN structure, an additional layer of protection, simplifying network configuration while saving VLAN resources
- VLAN support and tagging
  Supports the IEEE 802.1Q (4094 VLAN IDs)

**Layer 3 services**
- Loopback interface address
  Defines an address in Routing Information Protocol (RIP) and Open Standard Path First (OSPF), improving diagnostic capability
- Address Resolution Protocol (ARP)
  Determines the MAC address of another IP host in the same subnet; supports static ARPs; gratuitous ARP allows detection of duplicate IP addresses; proxy ARP allows normal ARP operation between subnets or when subnets are separated by a Layer 2 network
- Dynamic Host Configuration Protocol (DHCP)
  Simplifies the management of large IP networks and supports client and server; DHCP Relay enables DHCP operation across subnets
- User Datagram Protocol (UDP) helper function
  Allows UDP broadcasts to be directed across router interfaces to specific IP unicast or subnet broadcast addresses and prevents server spoofing for UDP services such as DHCP

**Layer 3 routing**
- IPv4 routing protocols
  Support static routes, RIP, OSPF, ISIS, and BGP
- IPv6 routing protocols
  Provide routing of IPv6 at wire speed; support static routes, RIPng, OSPFv3, IS-ISv6, and BGP4+ for IPv6
• PIM-SSM, PIM-DM, and PIM-SM (for IPv4 and IPv6)
  Support IP multicast address management and inhibition of DoS attacks
• MPLS support
  Provides extended support of MPLS, including MPLS VPNs and MPLS Traffic Engineering (MPLS TE)
• Virtual Private LAN Service (VPLS)
  Establishes point-to-multipoint Layer 2 VPNs across a provider network
• Bidirectional Forwarding Detection (BFD)
  Enables link connectivity monitoring and reduces network convergence time for RIP, OSPF, BGP, IS-IS, VRRP, MPLS, and IRF
• Policy-based routing
  Makes routing decisions based on policies set by the network administrator
• Equal-Cost Multipath (ECMP)
  Enables multiple equal-cost links in a routing environment to increase link redundancy and scale bandwidth
• IPv6 tunneling
  Allows a smooth transition from IPv4 to IPv6 by encapsulating IPv6 traffic over an existing IPv4 infrastructure

Security
• Access control lists (ACLs)
  Provide IP Layer 2 to Layer 4 traffic filtering; support global ACL, VLAN ACL, port ACL, and IPv6 ACL; up to 6,144 ingress ACLs and 1,024 egress ACLs are supported
• IEEE 802.1X
  Defines an industry-standard method of user authentication using an IEEE 802.1X supplicant on the client in conjunction with a RADIUS server
• MAC-based authentication
  Authenticates the client with the RADIUS server based on the client’s MAC address
• Identity-driven security and access control
  – Per-user ACLs
    Permit or deny user access to specific network resources based on user identity and time of day, allowing multiple types of users on the same network to access specific network services without risking network security or providing unauthorized access to sensitive data
  – Automatic VLAN assignment
    Assigns users automatically to the appropriate VLAN based on their identities
• Port security
  Allows access only to specified MAC addresses, which can be learned or specified by the administrator
• Secure FTP
  Allows secure file transfer to and from the switch; protects against unwanted file downloads or unauthorized copying of a switch configuration file
• STP BPDU port protection
  Blocks Bridge Protocol Data Units (BPDUs) on ports that do not require BPDUs, preventing forged BPDU attacks
• DHCP protection
  Blocks DHCP packets from unauthorized DHCP servers, preventing denial-of-service attacks
• DHCP snooping
  Helps ensure that DHCP clients receive IP addresses from authorized DHCP servers and maintain a list of DHCP entries for trusted ports; prevents reception of fake IP addresses and reduces ARP attacks, improving security
• DHCPv6 snooping
  Ensures that DHCPv6 clients obtain IPv6 addresses from authorized DHCPv6 servers and record IP-to-MAC mappings of DHCPv6 clients
• Dynamic ARP protection
  Blocks ARP broadcasts from unauthorized hosts, preventing eavesdropping or theft of network data
• STP root guard
  Protects the root bridge from malicious attacks or configuration mistakes
• Guest VLAN
  Provides a browser-based environment to authenticated clients that is similar to IEEE 802.1X
• Port isolation
  Protects and adds privacy, and prevents malicious attackers from obtaining user information
• Endpoint Admission Defense (EAD)
  Provides security policies to users accessing a network
• RADIUS/HWTACACS
  Eases switch management security administration by using a password authentication server
• Secure management access
  Delivers secure encryption of all access methods (CLI, GUI, or MIB) through SSHv2 and SNMPv3
• Unicast Reverse Path Forwarding (URPF)
  Allows normal packets to be forwarded correctly, but discards the attaching packet due to lack of reverse path route or incorrect inbound interface; prevents source spoofing and distributed attacks; supports distributed UFPF
• IP source guard
  Helps prevent IP spoofing attacks
• IPv6 source guard
  Help prevent IPv6 spoofing attacks using ND Snooping as well as DHCPv6 Snooping
• ND Snooping
  Allows only packets with a legally obtained IPv6 address to pass
**Virtual private network (VPN)**
- Generic Routing Encapsulation (GRE)
  
  Transports Layer 2 connectivity over a Layer 3 path in a secured way; enables the segregation of traffic from site to site

**Convergence**
- LLDP-MED (Media Endpoint Discovery)
  
  Defines a standard extension of LLDP that stores values for parameters such as QoS and VLAN to automatically configure network devices such as IP phones
- Internet Group Management Protocol (IGMP)
  
  Utilizes Any-Source Multicast (ASM) or Source-Specific Multicast (SSM) to manage IPv4 multicast networks; supports IGMPv1, v2, and v3
- Multicast Source Discovery Protocol (MSDP)
  
  Allows multiple PIM-SM domains to interoperate; is used for inter-domain multicast applications
- Multicast Border Gateway Protocol (MBGP)
  
  Allows multicast traffic to be forwarded across BGP networks and kept separate from unicast traffic
- Multicast VLAN
  
  Allows multiple VLANs to receive the same IPv4 or IPv6 multicast traffic, lessening network bandwidth demand by reducing or eliminating multiple streams to each VLAN
- LLDP-CDP compatibility
  
  Receives and recognizes CDP packets from Cisco's IP phones for seamless interoperation

**Additional information**
- Green initiative support
  
  Provides support for RoHS and WEEE regulations
- Green IT and power
  
  Improves energy efficiency through the use of the latest advances in silicon development; shuts off unused ports and utilizes variable-speed fans, reducing energy costs

**Warranty and support**
- Limited Lifetime Warranty 2.0
  
  Advance hardware replacement with next-business-day delivery (available in most countries). See [hp.com/networking/warrantysummary](http://hp.com/networking/warrantysummary) for duration details.
- Electronic and telephone support (for Limited Lifetime Warranty 2.0)
  
  Limited 24x7 telephone support is available from HP for the first 3 years; limited electronic and business hours telephone support is available from HP for the entire warranty period; to reach our support centers, refer to [hp.com/networking/contact-support](http://hp.com/networking/contact-support); for details on the duration of support provided with your product purchase, refer to [hp.com/networking/warrantysummary](http://hp.com/networking/warrantysummary).
- Software releases
  
  To find software for your product, refer to [hp.com/networking/support](http://hp.com/networking/support); for details on the software releases available with your product purchase, refer to [hp.com/networking/warrantysummary](http://hp.com/networking/warrantysummary).

<td>Maximum power rating and maximum heat dissipation are the worst-case theoretical maximum numbers provided for planning the infrastructure with fully loaded PoE (if equipped), 100% traffic, all ports plugged in, and all modules populated. PoE power is the power supplied by the internal power supply. It is dependent on the type and quantity of power supplies. Device supports 1 or 2 internal modular power supplies. JG544A will supply 450 watts of PoE+ power per installed unit. JG545A will supply up to 800 watts of PoE+ power per installed unit.</td>
</tr>
</tbody>
</table>

### Notes
- Maximum power rating and maximum heat dissipation are the worst-case theoretical maximum numbers provided for planning the infrastructure with fully loaded PoE (if equipped), 100% traffic, all ports plugged in, and all modules populated.

### Safety

# HP 5500 HI Switch Series

## Specifications (continued)

### Standards and Protocols (continued)

**IPv6**

- RFC 1881 IPv6 Address Allocation Management
- RFC 1887 IPv6 Unicast Address Allocation Architecture
- RFC 1981 IPv6 Path MTU Discovery
- RFC 2080 RIPng for IPv6
- RFC 2373 IPv6 Addressing Architecture
- RFC 2375 IPv6 Multicast Address Assignments
- RFC 2460 IPv6 Specification
- RFC 2461 IPv6 Neighbor Discovery
- RFC 2462 IPv6 Stateless Address Auto-configuration
- RFC 2463 ICMPv6
- RFC 2464 Transmission of IPv6 over Ethernet Networks

- RFC 2473 Generic Packet Tunneling in IPv6
- RFC 2475 IPv6 Diffserv Architecture
- RFC 2710 Multicast Listener Discovery (MLD) for IPv6
- RFC 2711 IPv6 Router Alert Option
- RFC 2740 OSPFv3 for IPv6
- RFC 2893 Transition Mechanisms for IPv6 Hosts and Routers
- RFC 2925 Definitions of Managed Objects for Remote Ping, Traceroute, and Lookup Operations (Ping only)
- RFC 3162 RADIUS and IPv6
- RFC 3306 Unicast-Prefix-based IPv6 Multicast Addresses
- RFC 3307 IPv6 Multicast Address Allocation

**MIBs**

- RFC 1212 Concise MIB Definitions
- RFC 1273 MIBII
- RFC 1493 Bridge MIB
- RFC 1657 BGP-4 MIB
- RFC 1724 RIPv2 MIB
- RFC 1757 Remote Network Monitoring MIB
- RFC 1850 OSPFv2 MIB
- RFC 2011 SNMPv2-MIB for IPv4
- RFC 2012 SNMPv2-MIB for TCP
- RFC 2096 IP Forwarding Table
- RFC 2333 Interface MIB

- RFC 2452 IPv6-UDP-MIB
- RFC 2454 IPv6-UDP-MIB
- RFC 2465 IPv4 MIB
- RFC 2466 ICMPv6 MIB
- RFC 2571 SNMP Framework MIB
- RFC 2572 SNMP-UDP MIB
- RFC 2573 SNMP-Target MIB
- RFC 2574 SNMP-UX MIB
- RFC 2618 RADIUS Authentication Client MIB
- RFC 2620 RADIUS Accounting Client MIB
- RFC 2665 Ethernet-Like-MIB

**MPLS**

- RFC 2961 RSVP Refresh Overhead Reduction Extensions
- RFC 3031 Multiprotocol Label Switching Architecture
- RFC 3032 MPLS Label Stack Encoding
- RFC 3036 LDP-Specification Distribution Protocol (LDP) Signaling
- RFC 4762 Virtual Private LAN Service (VPLS) Using Label

**Network management**

- IEEE 802.1AB Link Layer Discovery Protocol (LLDP)
- IEEE 802.1D (STP)
- RFC 1157 SNMPv1
- RFC 1212 Concise MIB definitions
- RFC 1215 Convention for defining traps for use with the SNMP
- RFC 1757 RMON 4 groups: Stats, History, Alarms and Events
- RFC 1901 SNMPv2 Introduction
- RFC 1918 Private Internet Address Allocation
- RFC 2373 Remote Network Monitoring Management Information Base for High Capacity Networks
- RFC 2571 An Architecture for Describing SNMP Management Framework
- RFC 2572 Message Processing and Dispatching for the Simple Network Management Protocol (SNMP)
- RFC 2573 SNMP Applications
- RFC 2574 SNMPv3 User-based Security Model (USM)
- RFC 2575 SNMPv3 View-based Access Control Model (VACM)
- RFC 2576 Coexistence between SNMP versions
- RFC 2578 SMv2
- RFC 2581 TCP6
- RFC 2819 Remote Network Monitoring Management Information Base
- RFC 2925 Definitions of Managed Objects for Remote Ping, Traceroute, and Lookup Operations
- RFC 3176 ifLow
- RFC 3410 Introduction to Version 3 of the Internet-standard Network Management Framework
- RFC 3413 Simple Network Management Protocol (SNMP) Applications
- RFC 3414 SNMPv3 User-based Security Model (USM)
- RFC 3415 SNMPv3 View-based Access Control Model (VACM)
- ANSI/TIA-1057 LLDB Media Endpoint Discovery (LLDP-MED)
- SNMPv1/v2c/v3

**OSPF**

- RFC 1587 OSPF NSSA
- RFC 1850 OSPFv3 Management Information Base (MIB), traps
- RFC 2328 OSPFv2
- RFC 2370 OSPF Opaque LSA Option

**QoS/CoS**

- IEEE 802.1P (CoS)
- RFC 2474 DSCP DiffServ
- RFC 2475 DiffServ Architecture
- RFC 2597 DiffServ Assured Forwarding (AF)
- RFC 2598 DiffServ Expedited Forwarding (EF)
- RFC 2698 A Two Rate Three Color Marker
- RFC 4594 Configuration Guidelines for DiffServ Service Classes

**Security**

- IEEE 802.1X Port Based Network Access Control
- RFC 1492 TACACS+
- RFC 1918 Address Allocation for Private Internets
- RFC 2865 RADIUS Authentication
- RFC 2866 RADIUS Accounting Access Control Lists (ACLs)
- RFC 3579 RADIUS Support For Extensible Authentication Protocol (EAP)
- MAC Authentication
- Port Security
- SSHv2 Secure Shell

## Modules
- HP 5500 2-port 10GbE XFP Module (JD359B)
- HP 5500 2-port 10GbE Local Connect Module (JD360B)
- HP 5500 1-port 10GbE XFP Module (JD361B)
- HP 5500/4800 2-port 6Gb SFP Module (JD367A)
- HP 5500/5120 2-port 10GbE SFP+ Module (JD368B)
- HP 5500 Hi B-port Gig-T Module (JG313A)
- HP 5500 Hi B-port SFP Module (JG314A)
- HP 5500/5120 2-port 10GBASE-T Module (JG355A)

## Transceivers
- HP X110 100M SFP LC FX Transceiver (JD102B)
- HP X110 100M SFP LC LH40 Transceiver (JD090A)
- HP X110 100M SFP LC LHBO Transceiver (JD091A)
- HP X110 100M SFP LC LX Transceiver (JD120B)
- HP X120 1G SFP LC BX 10-D Transceiver (JD099B)
- HP X120 1G SFP LC BX 10-U Transceiver (JD098B)
- HP X120 1G SFP LC LH40 1550nm Transceiver (JD062A)
- HP X120 1G SFP LC LX Transceiver (JD119B)
- HP X120 1G SFP LC SX Transceiver (JD118B)
- HP X120 1G SFP RJ45 T Transceiver (JD089B)
- HP X125 1G SFP LC LH40 1310nm Transceiver (JD061A)
- HP X125 1G SFP LC LH40 Transceiver (JD063B)
- HP X130 10G SFP+ LC LR Transceiver (JD094B)
- HP X130 10G SFP+ LC LR M Transceiver (JD093B)
- HP X130 10G SFP+ LC SR Transceiver (JD092B)
- HP X130 10G SFP+ LC LH 80km Transceiver (JG915A)
- HP X130 10G XFP LC LR Transceiver (JD108B)
- HP X130 10G XFP LC LR M Transceiver (JD117B)
- HP X130 10G XFP LC ZR 1550nm Transceiver (JD107A)
- HP X135 10G XFP LC ER Transceiver (JD121A)
- HP X240 10G SFP+ SFP+ 7m Direct Attach Copper Cable (JC784C)
- HP X240 10G SFP+ to SFP+ 0.65m Direct Attach Copper Cable (JD095C)
- HP X240 10G SFP+ to SFP+ 1.2m Direct Attach Copper Cable (JD096C)
- HP X240 10G SFP+ to SFP+ 3m Direct Attach Copper Cable (JD097C)
- HP X240 10G SFP+ to SFP+ 5m Direct Attach Copper Cable (JG081C)

## Cables
- HP 0.5 m Multimode OM3 LC/LC Optical Cable (AJ833A)
- HP 1 m Multimode OM3 LC/LC Optical Cable (AJ834A)
- HP 2 m Multimode OM3 LC/LC Optical Cable (AJ835A)
- HP 5 m Multimode OM3 LC/LC Optical Cable (AJ836A)
- HP 15 m Multimode OM3 LC/LC Optical Cable (AJ837A)
- HP 30 m Multimode OM3 LC/LC Optical Cable (AJ838A)
- HP 50 m Multimode OM3 LC/LC Optical Cable (AJ839A)
- HP Premier Flex LC/LC Multi-mode OM4 2 fiber 1m Cable (QK732A)
- HP Premier Flex LC/LC Multi-mode OM4 2 fiber 2m Cable (QK733A)
- HP Premier Flex LC/LC Multi-mode OM4 2 fiber 5m Cable (QK734A)
- HP Premier Flex LC/LC Multi-mode OM4 2 fiber 15m Cable (QK735A)
- HP Premier Flex LC/LC Multi-mode OM4 2 fiber 30m Cable (QK736A)
- HP Premier Flex LC/LC Multi-mode OM4 2 fiber 50m Cable (QK737A)
- HP X230 Local Connect 50cm CX4 Cable (JD363B)
- HP X230 Local Connect 100cm CX4 Cable (JD364B)
- HP X230 CX4 to CX4 3m Cable (JD365A)
