

Enhance Your Out-of-Box Experience

Integrate selected third-party, or specific hardware devices models and revision with your new HP PCs at the factory before shipment

Simplify your PC deployments and customer-configure your fleet before it leaves the factory with one Hardware Configuration Service process

HP Hardware Configuration Services leverages HP's industry leading factory, logistics, and integration processes to seamlessly integrate selected hardware to your device. Additionally, you can have HP procure and integrate third-party hardware components at the factory during the manufacturing and build process to help ensure that devices are delivered ready to use.

Custom configure your fleet before it leaves the factory

The HP Hardware Integration and Management Service is for when you need standardized settings for your employee devices. Streamline the process for your IT team by letting HP procure, apply, and test your custom firmware and hardware configurations at the factory during the device build process. This service enables you to select, standardize, and configure the device models throughout an agreed-upon manufacturing timeframe. Additionally HP will procure and integrate for you HP or non-HP hardware components into HP PC units to ensure that the devices are delivered to your exact end-user and business needs.

HP Services are governed by the applicable HP terms and conditions of service provided or indicated to Customer at the time of purchase. Customer may have additional statutory rights according to applicable local laws, and such rights are not in any way affected by the HP terms and conditions of service or the HP Limited Warranty provided with your HP Product.
