

Ensure patient care continuity with downtime reporting

HP Output Central for Healthcare

HP Output Central solutions help ensure optimum patient care for both planned and unplanned network outages

Save costs

HP Output Central helps healthcare organisations:

- Reduce management costs
- Provide a single point of control for an unlimited number of devices
- Reduce the need for costly Windows® print servers

Output management business value

HP Output Central software promotes faster and better healthcare information delivery while helping you save money.

Whether your clinical staff needs timely downtime reports to deliver quality care or you need to better control your print management costs, HP has the solution for you.

HP's flexible, platform-independent architecture provides a customisable, central point of access to all information across the organisation, both during downtime events and during normal operations.

HP Output Central provides assured delivery of Medication Administration Records (MARs), Physician Rounding Reports, and other critical information—regardless of origin, destination, or Electronic Medical Record (EMR) vendor.

Uninterrupted workflow

Ensure business continuity

HP Output Central can help organisations achieve their downtime planning goals with secure report distribution to multiple communications channels.

Rules-based document retention and purging ensures that the correct patient

records are available for reprinting or online viewing in unplanned healthcare downtime events.

By enabling patient-facing staff to access clinical documentation during unplanned downtime events, our solutions lessen the impact of healthcare downtime on hospital staff and patients alike.

Assured delivery

Meet your unique needs

The flexible, highly customisable HP solution architecture supports both centralised and decentralised approaches—helping you meet your unique physician and nursing requirements.

Receive all-the-time downtime support

Get access to documents during scheduled or unscheduled downtimes, including system testing, network outages, or loss of access to critical clinical applications.

Automate document management

Automatically purge reports based on your clinical, business, or legal requirements.

Centralise for simplicity

Combine various processes and applications into one, simple-to-use system.

HP Output Central delivers multichannel output and downtime reporting

Healthcare environment

Clinical information system

Patient accounting

Pharmacy system

Laboratory system

Healthcare information management

Output

Downtime reporting

Archive

Empowering a system of care that places you and your patients at the center of the solution

HP downtime reporting benefits

Reduce manual processes

Avoid manually printing, handling, separating, and distributing paper reports during downtime events.

Simplify document storage

Centralise and secure report storage for online viewing and print options, similar to a real-time environment.

Easily transform and access documents

Improve accessibility by delivering reports and data to PDF and other standard formats.

Conveniently audit, track, and analyse reports

Administrators can easily see who accessed or printed reports—when, where, and how often.

Protect your documents

Securely access PDFs that have been converted, password protected, and encrypted.

Drive intelligent document distribution

Combine data from one or more sources and provide assured report delivery to nursing stations or other points of care.

The HP Advance output management solution

HP Output Central offers a simple yet effective solution for integrating with healthcare systems. This helps improve the performance of healthcare communications, which, in turn can result in better user and IT productivity, and improved patient outcomes. It is also an integral part of HP's robust, scalable HP Advance output management platform, which offers:

- A flexible solution portfolio to meet the needs of almost any organisation
- Scalable, high-performance solutions with robust document security and auditing functions
- Reliable document delivery from any platform—mobile to mainframe—to virtually any print destination
