

Advance your print ecosystem to the cloud

HP Managed Print Cloud Services (MPCS)

HP transitions your entire print ecosystem to the cloud and manages your print software stack. Count on a secure, fully managed printing experience across home, office, public, and shared spaces.

Depend on HP MPCS to

- Deliver secure provisioning and management through the cloud for your print infrastructure, end-to-end
- Include all required virtual servers, storage, networking, software, and solutions
- Provide all the printing components through a tested stack
- Deploy a best-fit cloud environment
- Allow your IT personnel to focus on business-critical activities

Make sure your cloud strategy includes print

As companies transition to the cloud, the print environment can be forgotten. HP Managed Print Cloud Services helps you implement a comprehensive transition to the cloud. Designed to align to your print software stack, you can count on HP to provide the right fit for your organisation, no matter what stage you are at in your cloud journey.

Help lower your technology footprint costs

Offload the provisioning and management of your entire print infrastructure. HP MPCS is a standard, yet configurable, global managed service for secure, always-on printing.

Help keep costs down by relying on HP to manage your firmware, solutions, and servers. Choose from Trusted to Zero Trust security architectures for your HP MPCS implementation, and count on flexible options that can evolve with your business.

Free up IT and focus on your business

IT's time and resources are often barely enough to keep on top of day-to-day management tasks. That means there's little time for new projects or initiatives.

Redirect your critical IT efforts to core, differentiating activities and let HP experts help optimise costs, maximise resources and personnel, and reduce hassle.

HP MPCS uses proactive infrastructure and security monitoring with optimised upgrade strategies, allowing you to minimise downtime and service calls.

Speed innovation and experiences

As the largest provider of PCs and printers, HP's IT know-how is both deep and expansive.

Transform your business operations by taking advantage of cloud agility to deploy your print environment and applications in remote locations within hours. HP devices deliver the World's Most Secure Printers and use a secure cloud connection to help protect you from security threats.¹

HP MPCS design elements:

- Global
- Flexible managed services
- Customisable cloud environment
- HP-certified hosted environment
- End-to-end security

Trust a global leader

The HP MPCS team has the certifications to support you on your cloud journey

#1 America's most responsible companies²

170 countries³

36+ years of experience³

#11 of world's 250 best-managed companies⁴

1,000,000+ devices under contract³

Awards for Healthcare, Education, Financial Services, Retail, Security, Mobility, Reliability, Sustainability, and MFP Accessibility⁵

What is MPCS?

HP Managed Print Cloud Services is globally managed and delivers an always-on print environment with layered security, optimised for each client's unique business needs.

With a pre-built stack of infrastructure services, HP MPCS print application modules are developed, automated, cost-optimised, and tested for scalability and performance.

From a Trusted or Zero Trust cloud environment, HP provisions all required virtual servers, storage, networking, software and solutions to run and deliver the whole managed service with minimal need from your IT personnel.

Key components of MPCS include:

- Optimised printing architecture based on HP best practices and designed to meet your unique needs
- Performance management and reporting
- Server security, monitoring, and management
- Cloud print software administration

- Cyber security best practices
- Print software stack installation, support, and maintenance
- Proactive print infrastructure monitoring
- ITIL incident and problem management

Count on a full range of security solutions

Accelerate your solution deployment schedules and deliver more innovation and time-to-value to your business using a centrally managed, agile print solution integration.

You don't have to worry about security. Whether you need a Trusted or Zero Trust cloud environment, HP meets your security requirements. HP Managed Print Cloud Services provides numerous configuration options and are designed, built, and managed to HP's rigorous Security Development Lifecycle standards.

¹ "World's most secure printing" or "most resilient printers" claims include HP's most advanced embedded security features which are available on HP Enterprise and HP Managed devices with HP FutureSmart firmware 4.5 or above. The claim is based on HP review of 2019 published features of competitive in-class printers. Only HP offers a combination of security features to automatically detect, stop, and recover from attacks with a self-healing reboot, in alignment with NIST SP 800-193 guidelines for device cyber resiliency.
