Security, control, productivity

HP Access Control Secure Pull Printing Solution helps healthcare organizations increase security and eliminate unclaimed documents

What if you could...

- Protect documents and encrypt print jobs on their way to a device?
- Enhance the security of networked printers by easily authenticating devices and users?
- Offer print-reliant departments, and mobile or remote workers access to the features they need?
- Delete unclaimed and obsolete jobs prior to printing—saving money and conserving resources?

## Virtually eliminate wasted and non-secure print output

Your healthcare organization faces increased demand to address security, compliance, environmental, and cost-reduction objectives. At the same time, an increasingly mobile workforce requests the ability to print when and where they need to. Convenient pull-printing solutions and authentication methods can help increase security and also help boost the productivity of your local, remote, and mobile workers.

HP Access Control Secure Pull Printing enables users to print to the network and then retrieve jobs at any solution-enabled device —only when they go to that device and authenticate themselves. Pull printing virtually eliminates unclaimed documents and increases the efficiency of mobile workers.

Solution at a glance

Reinforce security, restore control, and help reduce costs. HP Access Control Secure Pull Printing helps protect patient information and secure printing environments—all while increasing convenience for local, mobile, and remote clinical care providers. Lower costs and protect privacy by better controlling print output and ensuring that unclaimed jobs don't sit exposed in printer output trays. Control access to networked devices. Give users the ability to retrieve jobs when and where they need to by simply accessing HP Access Control Secure Pull Printing-enabled networked device. Create the same user ability to access documents and print—virtually wherever and whenever healthcare happens. And, when you deploy HP Access Control Secure Pull Printing through an HP Managed Print Services agreement, the solution supports not only HP single-function printers, multifunction printers (MFPs), and networked scanners, but selected imaging and printing devices from Canon, Lexmark, Ricoh, and Xerox as well, so you can gain these benefits with your current asset mix.

HP Access Secure Pull Printing Solution

Users send confidential documents to be printed

Documents are stored on your secure server hard drive

Users can authenticate with ease through a variety of methods

Users can retrieve jobs when and where they need them

Solution features

Deliver jobs to the right user, every time

Store documents on your secure server hard drive, and give users the ability to authenticate to release their specific print job. The job remains in the queue until confirmed and released by the user, and is then printed on the spot—to any solution-enabled device on the network.

Authenticate with ease

Set up simple user authentication directly at the device, using HP proximity card readers, alpha-numeric personal identification codes (PIC), personal identification number codes (PIN), or smart cards.

Store and secure confidential documents

Help ensure that only the user who sent the print job may retrieve it. Jobs can be encrypted both in transit and on the printer's secure hard drive. Even enable HP Access Control Secure Pull Printing without using a server.

Streamline print queues

Reduce the amount of managed print queues. Users can pull select print jobs directly and securely from device print queues—even use the "select all" button to print an entire set of documents.

Print from virtually anywhere within your network[1]

Enable users to retrieve documents using a smartphone or other mobile device. The HP Access Control Mobile Release allows users to send a job to a specific queue, authenticate using a smartphone or mobile device, preview their job list, and then select and print it.

Reduce costs and unclaimed jobs

Establish policies that promote responsible printing practices and help conserve paper and energy. Automatically delete unclaimed print jobs after a designated period of time.

Why HP?

For more than 50 years, HP has been partnering with leading healthcare organizations, supplying the technical expertise and business savvy required to position these companies at the forefront of healthcare innovation. Today, industry analysts rank HP as a leading provider of information technology and services to the health and life sciences industry. In fact, nearly half of the top 10 healthcare equipment and services companies are HP Managed Print Services clients.[2]

HP's patient-centered healthcare solutions enable providers and empower patients with more powerful and intuitive solutions that deliver better care. We can help you improve care delivery, patient engagement, and population health management.

We will take the time to understand your specific needs and create a plan to help optimize your fleet, ensure data and document security, and manage your evolving workplace.

Get started

Contact your local HP representative to:
• Set up a workshop to assess your specific business needs.

• Establish a plan to implement the best solution for today and into the future.

• Identify an environmental approach that can help your organization save money.
