Original HP Ink Cartridges

HP uses recycled plastic in the manufacture of Original HP ink cartridges

Original HP ink cartridges have been engineered to use recycled plastic and still meet HP's demanding standards for quality and reliability. Recycled plastic from Original HP ink cartridges—returned by customers through the HP Planet Partners program—is combined with recycled plastic bottle materials or recycled apparel hangers to create new Original HP ink cartridges.¹

HP has produced more than 4.2 billion Original HP ink cartridges using this post-consumer recycled content. The recycled plastic used in Original HP ink cartridges has an average 30% smaller carbon footprint than the virgin plastic used in Original HP ink cartridges.²

1. For HP ink cartridges that use recycled materials, 45-70% of the cartridge is made from recycled content. Percentage of recycled material is based on empty weight. HP uses recycled plastic from the HP closed loop ink cartridge recycling process when supplies are available. Recycled plastic is also sourced from other recycle streams.

2. For cartridges produced in 2017 and beyond. Based on a 2018 life cycle assessment (LCA) performed by Four Elements Consulting and commissioned by HP. The study compared the environmental impact of using polyethylene terephthalate (PET) plastic with the environmental impact of using recycled PET and the impact of using polypropylene and recycled polypropylene to manufacture new Original HP ink cartridges. For details, see: hp.com/RecycledPlasticsLCA
