## Produce high-quality jobs, gain high versatility

- With a single device, print on both transfer paper and direct-to-fabric with great results.
- Enhance your backlit saturation performance on direct-to-fabric thanks to the contact heater.<sup>1</sup>
- Get deep blacks, vivid colours, and high-resolution with 1200 native dpi printheads and the Drop & Dry system.
- Reliable image quality at speed with a Smart Nozzle Compensation system and Optical Media Advance Sensor Plus.

## Meet your deadlines with high productivity

- Fast turnaround production with very short start-up times<sup>2</sup> and speeds up to 220 m<sup>2</sup>/hr.<sup>3</sup>
- Help increase your uptime with user-replaceable printheads and HP preventive maintenance support.<sup>4</sup>
- Confidently print unattended with spreader rollers, 10-liter ink supplies, and rolls up to 300 kg.
- Double throughput on substrates up to 1.6 m with the dual roll option.

## Save time with easy operation

- In 40% less time, a single operator can easily load both transfer and textile rolls.<sup>2</sup>
- Distribute jobs over the fleet, get colour consistency with built-in spectrophotometer/HP Configuration Center.
- Control your print operations virtually anytime, anywhere and make data-driven decisions with HP PrintOS.<sup>5</sup>

This printer is intended to work only with cartridges that have a new or reused HP chip, and it uses dynamic security measures to block cartridges using a non-HP chip. Periodic firmware updates will maintain the effectiveness of these measures and block cartridges that previously worked. A reused HP chip enables the use of reused, remanufactured, and refilled cartridges. More at: <http://www.hp.com/learn/ds>

## Messaging Footnotes

<sup>1</sup> Applicable to the backlit media included in the HP Media Solutions Locator, see <http://www.hp.com/go/mediasolutionslocator>.

<sup>2</sup> Very short start up times compared to alternative 126-inch dye-sublimation based textile printers under \$250,000 USD available as of July, 2020. Preparation time including 40% less loading time, printhead cleaning, and warm up time. This is based on internal HP testing in July, 2020 and features including automatic media tension adjustment and easy, simple media path, automatic and optimised printhead cleaning, and warm up in parallel with loading. Testing was performed measuring the time from starting the printer loading process until the printer starts printing, and measuring time with a chronometer.

<sup>3</sup> Production-Economy print mode, 2-pass, 50%, for certain patterns of curtains and upholstery for interior décor applications. Based on internal HP testing in February, 2019 on transfer paper (Coldenhove Jet-X 57 grams, 126-in/3.2-m width).

<sup>4</sup> Individual services may be provided by HP or an HP-authorized partner. Some services depend on printer, service contract, and region availability.

<sup>5</sup> HP PrintOS is available in both web and mobile app view and needs the printer to be connected to the Internet. The HP PrintOS Mobile Application is compatible with Android™ 4.0 or later and iPhone mobile devices running iOS 8 or later.

## Specification Footnotes

<sup>1</sup> The colour variation inside a printed job has been measured at 4-pass mode on transfer media and also in direct-to-fabric situations within this limit: maximum colour difference (95% of colours) ≤ 1.5 dE2000. Reflective measurements on a 943 colour target under CIE standard illuminant D50, and according to the standard CIEDE2000 as per CIE Draft Standard DS 014-6/E:2012. 5% of colours may experience variations above 1.5 dE2000. Backlit substrates measured in transmission mode may yield different results. Results are dependent on sublimation process variability.
