PLUS REQUIRED

Standard printer applications and other training content

LEARN²

Advanced training content and videos

LEARN PREMIUM⁴

HP Learn³

FREE/PLUS

HP Mobile App

When you are off-site or do not have access to the web, you can still monitor your print production using your smartphone and the HP PrintOS mobile application.² With the HP PrintOS mobile app, you can also access HP Learn training content. Learn on the go without having to be in front of a PC.

HP Print Beat

Remotely monitor production performance across all devices and all sites from a single touchpoint with HP Print Beat.² Get notifications that help you stay on top of production. Access raw jobs data to calculate and control costs. Make effective data-driven decisions with reporting on key KPIs.

HP Configuration Center

Experience easy and consistent remote substrate management and color profiles with HP Configuration Center.² See issues that might impact quality (i.e. printhead alignment, color calibration, substrate profiles, or firmware updates) so that you can adjust and optimize for the best possible output quality. You can also access, manage, and deploy all available substrate profiles directly from the cloud.

HP Live Production

HP Print Beat Live Production⁴ takes remote monitoring to the next level by bringing print production live to you. Easily identify jobs and job queues of all registered printers across multiple sites in one comprehensive, at-a-glance view. With HP Live Production,⁴ production managers no longer require operator status reports, they can minimize production gaps, streamline cross communications, and confidently print unattended because they're receiving all the information as it happens.

HP Jobs API

Make your printer data available to your business' external ERP/MIS systems with HP Print Beat Jobs API.⁴ This single API allows you to monitor your HP printers alongside non-HP printers, automate processes, and combine with other operational data to generate rich business insights.

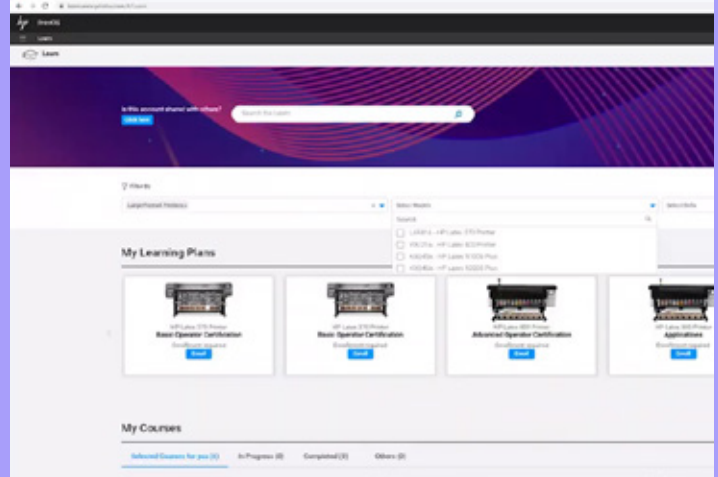

HP Design & eCommerce

With this intuitive web-to-print solution, you can save valuable time with simplified product design capabilities, efficient connection to production, and step-by-step guidance on how to integrate HP Design & eCommerce⁵ with your ecommerce store.

HP Learn

Our goal at HP is to help you learn how to operate the printer, optimize its use, and grow your business. HP Learn, part of HP PrintOS,¹ is the knowledge hub that makes this happen. HP Learn is a repository of materials/trainings for your registered printer. You can access free and/or premium content depending on the service plan that you choose. Free training materials are designed to raise printer—and operator—potential.³ Premium content, which is continually being updated with new, relevant topics, is designed to help you grow your business and get the most out of your HP printer.⁴

Connect securely in the cloud

At HP, we're committed to making sure your information—and your customers' information—remains secure. We work hard to protect data in transit and in the cloud, so that you can print with total confidence. To find out more, ask us for the HP PrintOS security and availability [white paper](#).
