

## HP Security Advisory Services

Get comprehensive cybersecurity lifecycle services focused on the personal systems in your network. HP helps you identify risks and proactively improve the security position of your multi-brand/multi-OS devices with a full suite of Security Advisory Services.

### Experts in security

Get a personalized assessment and plan of action from an HP team that includes experts with significant, relevant, hands-on experience servicing and supporting highly secure PC security architectures from the ground up.

### Proactive risk reduction

Free up your constrained IT security resources for other tasks and rely on experts who complement and enhance them, proactively identify gaps in your endpoint security profile, and recommend risk-reducing procedures to address vulnerabilities.

### Heterogeneous environments

Close the security gaps opened by multi-OS and multi-device environments with services that focus on securing them, whether they're Microsoft, Android™, or iOS, or a PC, tablet, or smartphone.

The number and variety of endpoint devices in your environment provide enormous advantages for communication, collaboration, and productivity—but they also expose your business to potential threats. Our experienced security specialists perform comprehensive audits, vulnerability scans, and penetration testing, so you can find and close the gaps in your security architecture before someone else exploits them.

Experienced,  
certified security experts

Trust a team that has multiple industry-recognized certifications related to penetration testing, auditing, and system and network security—and advanced degrees in computer science, computer engineering, and information technology.

Findings and  
recommendations reporting

Receive a detailed report of findings and recommendations for each security audit, vulnerability scan, and penetration test, delivered by a formal presentation to discuss how you can proactively address security risks and potential breaches.

Brand and  
OS-agnostic

Regardless of your brand or operating system, your HP team can leverage its endpoint device security expertise to jointly and simultaneously assess and advise you on your print and personal systems security.
