

3D Birthday Cake Centerpiece

STEP 1 / Print the designs with your Hp printer

STEP 2 / Cut around the illustrations

STEP 3 / Staple the matching bands together to create a ring

STEP 4 / do the same with the other bands

STEP 5 / cut fringes on the colored paper stripes (remember to keep an untouched band wide enough to put glue on)

STEP 6 / Glue your bands around the bottom of the birthday cake. You can mix the colors if you want.

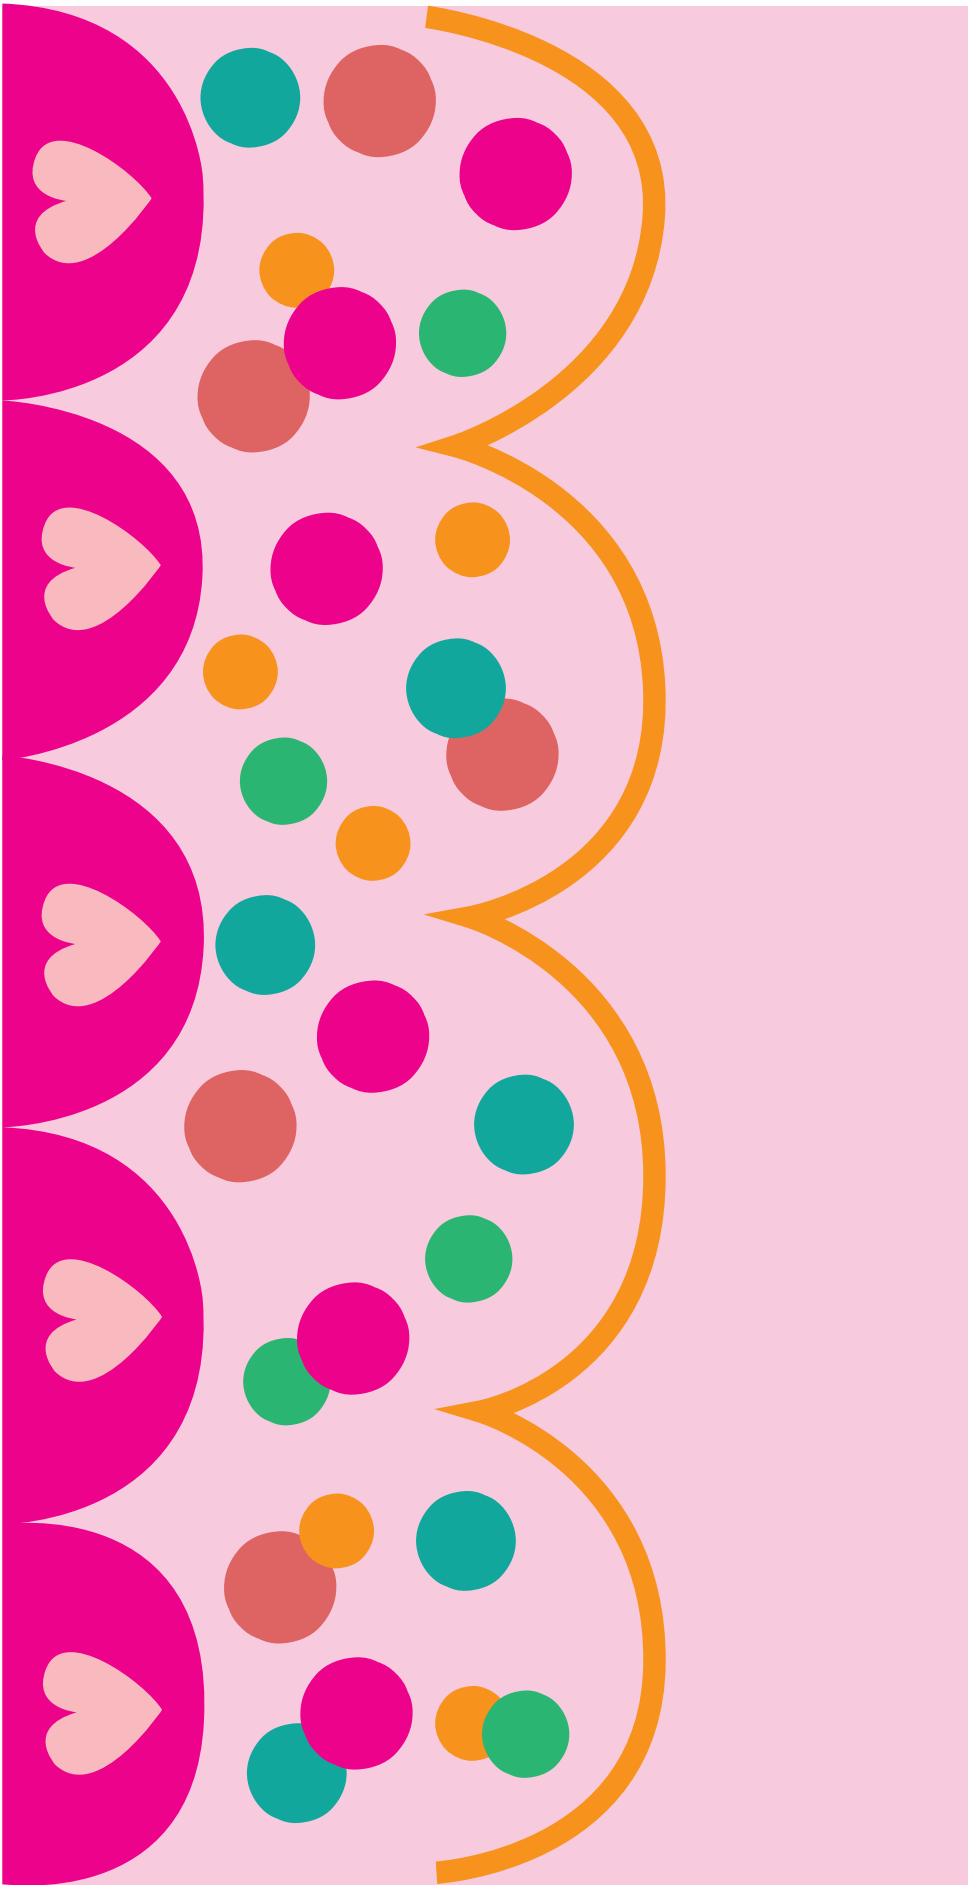

STEP 7 / We now need to cut paper circles to put them on the top of each cake. Use the cakes as references to trace the circles on colored paper sheet before cutting them out. You may also use cardboard or plain white paper sheets.

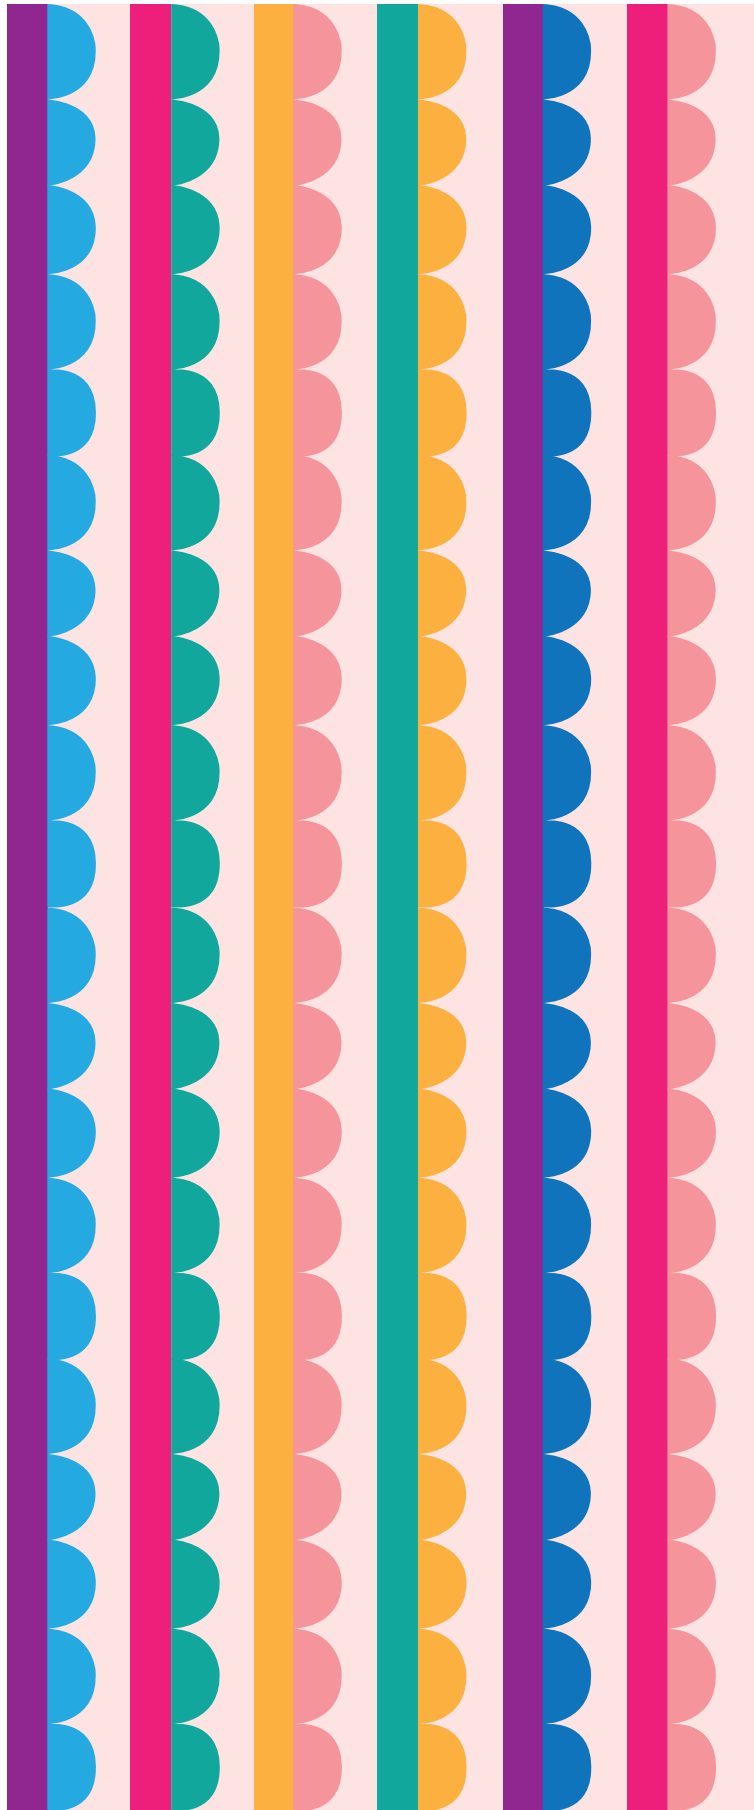

STEP 8 / Repeat step 7 for each different level of the cake

STEP 9/ Now you can add the candles and glue the levels on top of each other. Your birthday cake is ready. Happy Birthday !
