

Ease the pressure on your IT budget

Reduce the total cost of ownership and expand your business operations.

Digital transformation is at the centre of discussions amongst most leading CIO's and CFO's. Organisations are looking for ways to accelerate their transformation efforts but the cost to upgrade their technology is often a deterrent.

HP Integrated Financial Solutions understands the challenges organisations are faced with and we have come up with a flexible and affordable leasing solution to help you implement your next technology refresh.

Unlike CAPEX that is required upfront, we offer subsidised finance on a pay-for-use model. You pay for the equipment as you use it - for the period that its useful in your environment

Leasing allows businesses:

- To upgrade equipment without making a substantial upfront investment
- Avoid the interest, the residual and balloon payments charged by banks and finance houses
- Provides flexibility—a lease can be modified as often as necessary for a business to remain competitive
- Eliminates the hassles of storing and disposing of obsolete assets

If you are looking for a way to finance your next IT investment, speak to our team today for more information.

ABOUT HP INTEGRATED FINANCIAL SOLUTIONS:

At HP Integrated Financial Solutions, our goal is to help organisations acquire the right equipment they need to support their business goals and succeed in a competitive market.

We combine market-leading HP products with an effective financial and asset management solution to keep the total cost of ownership down. Unlike CAPEX that is required upfront or a traditional bank loan that includes interest payments, we offer subsidised finance. You only pay for a portion of the equipment for the period that its useful in your environment.

This pay-for-use model offers full scalability, complete flexibility, better resource management, and more agility in a constantly changing business world.

In addition, our reverse logistics process eliminates the hassles of storing and disposing obsolete assets, and when it is time to refresh with new equipment, we can assist with the planned upgrade.
