

## with Wolf Connect

Manage and protect remote PCs even when powered down

### The Problem

Managing and protecting a PC fleet is difficult, especially when PCs are powered down, disconnected from the internet or unable to boot the operating system.

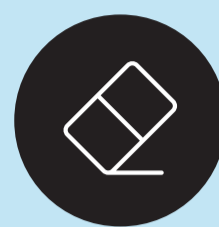

### How the Solution Works

Locate a PC in real time

Lock a PC to prevent unauthorized access

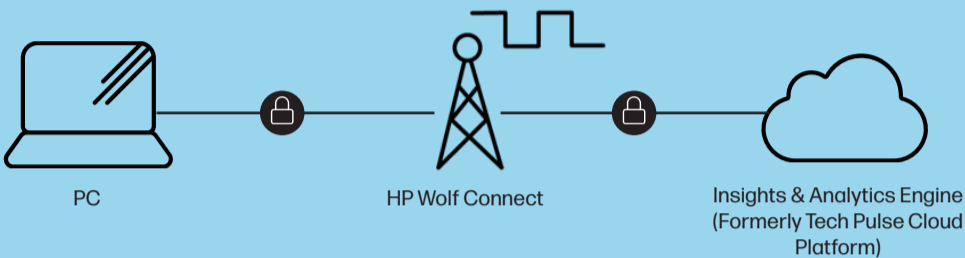

Erase a PC's primary disk to keep data safe

## The HP Difference: Wolf Connect

### The Solution

HP Wolf Connect provides a persistent, secure connection to end user PCs. Using low-bandwidth, low-power LTE-M cellular technology and unique HP PC hardware, Wolf Connect provides an "always on" remote connection to PCs even if disconnected from the internet or powered down.

### The Wolf Connect Vision

HP's vision is to simplify and expand PC management using Wolf Connect to support multiple capabilities in the future. Future proofing your HP PCs today with Wolf Connect provides unmatched investment protection.

### Business Outcomes

#### Asset Management

Decrease costs by maintaining tighter control over PC fleet.

#### Data Security

Secure data from unauthorized access.

#### Financial Risk Management

Lower risk of device loss for device as a service or leasing.

#### Find my PC

Find lost or stolen PCs

#### Sustainable Device Lifecycle

Manage devices from deployment to retirement, re-issue or recycle.

#### Audit & Compliance

Efficiently satisfy data and asset management controls.

### Benefits

#### Risk management

- Protect Data
- Reduce PC losses

#### IT operations

- Efficiently manage PC fleet
- Reduce tickets and PC remediations

#### User experience

- Quickly locate lost PC
- Reduce stress and anxiety

## Solution Architecture

### 1 Supported HP PC

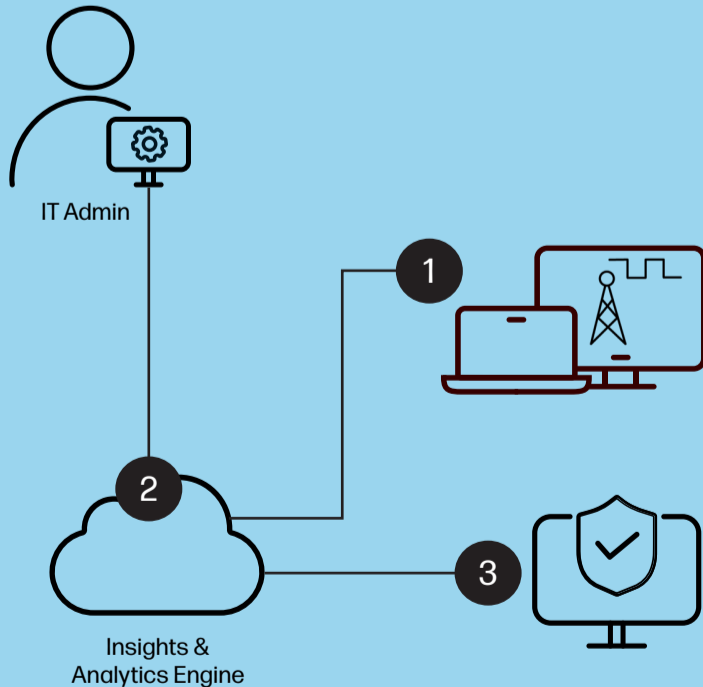

with included cellular radio and subscription

### 2 Insights & Analytics Engine

for centralized management

### 3 Approver application

for secure approval of sensitive Lock & Erase commands

#### Management

Insights & Analytics Engine is a unified fleet management console for:

- Protect & Trace with Wolf Connect
- ActiveCare
- Proactive Insights

#### Advanced Security

The Approver application increases security with separation of duties.

Splitting approval responsibilities, reduces risk of accidental or insider compromise.
