

# Making a dispersed workplace cohesive

How to ease the stress on workers and IT

HP recommends Windows 11 Pro for business

Unrivaled business PC solution

Today, your people are working in the office, at home, and on the go. This flexible approach to work comes with huge benefits, but it's also challenging for them and for you to support them.

You may have people at home taking Microsoft Teams meetings with a screaming toddler in the background. Some could be in airports working on sensitive documents while surrounded by strangers. Others could be at the office collaborating with their team in a conference room. And while you're equipping all these people across a multitude of situations, you're also working to keep everything provisioned, secure, up to date, and functioning smoothly around the clock.

With the right devices, services, and partners, you can provide solutions that help employees stay productive in different spaces. You can bring a quick resolution to their tech issues, help them be engaged everywhere they go, and keep them doing their best work. And with those right solutions, you can keep yourself and your IT team going strong.

Making a dispersed workplace cohesive

# Lessen their stress and yours

Here are areas where you can immediately provide solutions to stabilize people's workdays and ease your IT burden.

More than 80% of US workers suffer from work-related stress.<sup>1</sup>

## Help them move from space to space

While the notebook is now the standard for business, the same old notebook from before will no longer do. It now needs to be powerful because multitasking is the rule, not the exception. And your users may want it to be flexible and configurable to eliminate the need to carry a separate tablet.

Bring it all together with proven performance from a name you can trust. You'll keep people in the flow and productive even as they move from place to place.

## Help them look and sound their best

When people aren't seen and heard clearly, collaborations suffer. Make sure they have a notebook with AI noise reduction to ensure they're heard clearly, even with a barking dog or loud office mate in the background.

Also, make sure the cameras in PCs and meeting room systems follow the speaker and automatically adjust their volume level. It'll make a big difference in helping everyone on your team feel included in collaborations wherever they are.

## 5 common productivity killers

- ✓ The varying needs of employees working in different places
- ✓ Tech issues that cause extended downtime
- ✓ Background noise or poor video in virtual meetings
- ✓ Insufficient performance for power users
- ✓ Growing security risks

---

# 83%

of employees spend up to one-third of their work week in video meetings.<sup>2</sup>

# Reduce security stress

One click can spark a security breach. In fact, 95% of successful breaches occur due to human error,<sup>3</sup> so the PCs you supply must help offset the human factor.

Make sure that every notebook in your fleet has built-in zero-trust security features. They enable your users to work without worry from anywhere. And they help you worry less knowing your organization's PCs and data are safeguarded with little to no interruption to productivity.

## Get work done up to 42% faster with Windows<sup>4</sup>

HP works with Microsoft to bring you the full advantages of Windows 11 Pro. That includes maximizing speed with AI-powered multitasking,<sup>5</sup> signing into your cloud PC from anywhere<sup>6</sup> with Windows 365 Boot, and running any app, including Android.<sup>6</sup>

## Intel vPro<sup>®</sup> is designed to perform

Rigorously tested HP PCs with Intel vPro<sup>®</sup> deliver professional-grade experiences and multitasking capabilities with low-touch, remote management to make life easier for IT.<sup>7</sup>

## Put HP in your corner

Today, your IT team needs more than just devices and services that handle the demands of a flexible workforce. You need partners who recognize those demands and have designed products that fit the many asks. Plus, you need well-rounded, insightful solutions that allow you to meet every user's needs throughout their device lifecycle.

HP helps you find the right tech for every situation, so employees stay engaged at home, in the office, or on the go. We can help you build a work ecosystem with a range of flexible devices, solutions, and services in a way that relieves the panic and delivers on the potential.
