

Integrate home and office print management

HP Managed Print Services: Flexworker

Provide remote workers with the devices that are right for them, along with automatic, just-in-time supplies delivery

As the trend to a borderless workplace accelerates, supporting work wherever it happens—whether at home or in the office—has become a critical need. And the demands on IT can be overwhelming.

Finding the right device with the right set of printing and scanning features to fit your employees' needs is just the beginning. You're also called upon to leverage the power of the cloud and keep ahead of evolving threats to your network—all while keeping devices serviced and supplied with ink and toner.

MANAGE YOUR OFFICE AND REMOTE PRINTER FLEET

Provide the right devices with the right features, along with automatic supplies replenishment and proactive, remote management to keep users productive.

ADAPT AT THE SPEED OF BUSINESS

The transformation to a borderless workplace presents an opportunity to not just reevaluate the office, but to reimagine the future of business.

COUNT ON HP PRINT SECURITY

Printing at home should be as secure as it is in the office. HP provides organizations with secure home printing, tailored to their requirements.

GET SUPPLIES RIGHT WHEN YOU NEED THEM

Avoid the frustration of searching for and ordering depleted supplies. Increase efficiency and satisfaction for flexworkers, while lowering costs.

Manage printing for remote workers

HP has services to help you remove friction from day-to-day workflows for employees, regardless of where they work. This means eliminating manual, time-intensive, and error-prone processes for end users, as well as back-office IT team members. Achieving greater productivity also allows teams to focus on more strategic business initiatives that drive growth and innovation.

Remotely manage your fleet

- Simplify device onboarding with the HP Smart app¹
- Stay productive with automatic supplies replenishment
- Count on express exchange or next-business-day service²
- Get usage reporting in Device Control Center (DCC) and Strategic Business Reviews (SBR)

Manage your risk

- Securely connect Flexworker devices to the cloud for telemetry and supplies ordering
- Take advantage of HP Print Security Advisory Service
- Get expert guidance from HP Security Consultants based on best practices for home and remote workers
- Easily see and remediate HP Essential Security settings³

Give at-home workers the print functionality they need

- Depend on the world's most secure printing with HP LaserJet Enterprise Managed Devices⁴
- Trust embedded device security features in HP OfficeJet and LaserJet Pro devices
- Ship devices to home addresses

Count on a predictable rate for device support and supplies

- Take advantage of flexible financing with leasing or direct purchase
- Include flexworkers in your Managed Print Services contract for simple, monthly billing
- Depend on best-fit devices for your flexworkers' required page volume and print capabilities

HP WOLF SECURITY

HP's most advanced print security with layered protection and resiliency⁴

A thought leader for print security, HP delivers continued innovation as organizations support personnel working from home.

HP Flexworker includes security embedded in and around the device, with remote firmware updates and cloud-based security management capabilities, security services, and training assets for IT and end users.

Learn more at hp.com/go/mps

1. Requires the HP Smart app download (dependent on specific device). For details on local printing requirements see hp.com/go/mobileprinting

2. Availability varies by region.

3. Up to 15 settings are visible and able to be remediated, depending on Flexworker device type and functionality, via the HP Security Manager v.3.6.1 or above.

4. HP's most advanced embedded security features are available on HP Enterprise and HP Managed devices with HP FutureSmart firmware 4.5 or above. Claim based on HP review of 2021 published features of competitive in-class printers. Only HP offers a combination of security features to automatically detect, stop, and recover from attacks with a self-healing reboot, in alignment with NIST SP 800-193 guidelines for device cyber resiliency.
