PART 5

PARTS 7

PART  
8a

A vertical yellow column containing 18 rows of handwriting practice lines. Each row is defined by a solid top line, a dashed middle line, and a solid bottom line, providing a guide for letter height and placement.

PART  
8b

A vertical yellow column containing 18 rows of handwriting practice lines. Each row is defined by a solid top line, a dashed middle line, and a solid bottom line, providing a guide for letter height and placement.

PART  
9a

A vertical rectangular area with a yellow background, containing 15 sets of horizontal handwriting lines. Each set consists of a solid top line, a dashed middle line, and a solid bottom line.

PART  
9b

A vertical rectangular area with a yellow background, containing 15 sets of horizontal handwriting lines. Each set consists of a solid top line, a dashed middle line, and a solid bottom line.

# HP// Holiday project

## // Accordion instructions

---

- 1 Cut out all parts. Use a craft knife for best results.
2. Carefully fold along all fold lines (see key to identify which type of fold for each line).  
Before folding it is recommended to score the line lightly with a craft knife or a ballpoint pen that no longer has ink in it. This will make folding easier and more precise.
3. Glue side 1a to tab 1b.
3. Glue side 1c to tab 1d.
4. Glue side 2a to tab 1e.
5. Glue down sides 2b and 2c to the remaining tabs of part 1.
6. Assemble part 3 to make a rectangular box.
7. Glue tabs 4a and 4b to their corresponding markers on part 3 to make the handle.
8. Glue part 5 to the underside of part 4 to hide the white side of the handle.
9. Assemble each of the 3 buttons (part 7) by gluing side 7a onto tab 7b. Then fold down the teeth on one side and glue 7c on top. Then fold inwards the teeth on the other side and glue these to their corresponding markers on part 3.
10. Glue parts 6 onto their corresponding markers on part 2 to make the keys of the keyboard.

11. Taking parts 8a and 9a, slot the concertina corners together making a right angle with each concertina V inserted into a corresponding V at a right angle and glued into place (see diagram left).
12. Repeat the same process with parts 8b and 9b so that you have 2 identical right angle concertina shapes

# HP// Holiday project

## // Accordion instructions cont.

---

13. Join the 2 right angles together in the same manner to create a rectangular tunnel of concertina.
14. Glue one end of the concertina tunnel to the blank side of part 1 and the other end to the blank side of part 3. Hold in place until the glue dries.

### KEY
