

Trusted Zero Clients

Benefits

- Adhere to zero trust principles as recommended by organizations like NIST.
- Manage with existing endpoint management tools—that support Anyware Trust Center capabilities—to keep things simple.
- Secure boot, direct into Trusted Zero Client. No access to OS or BIOS for end user.
- Experience PCoIP® Ultra performance for graphics- and compute-intensive workloads.
- Do more with new A/V, peripheral, and wireless connectivity options.¹
- Connect to various digital workspaces, including Blast protocol support when connecting to Omnisssa Horizon.

Highlights

- Factory-created immutable signature (birth certificate is created and signed with a private key).
- System integrity confirmed at boot (system firmware is encrypted and secure boot process creates new signature).
- Anyware Trust Center validates all access with Trusted Zero Client (access is continuously monitored).
- Delivers color-accurate, lossless, and distortion-free remote user-experience.²
- Automatically adapts to changing network conditions for the best possible user experience.
- Leverages hardware video decoder to enable high resolution content delivery at up to 60 frames per second² across multiple displays.

Overview

Trusted Zero Clients take a big leap forward in security and performance. The next generation Trusted Zero Clients are designed with Zero Trust Architecture security features and managed by Anyware Trust Center.

The Trusted Zero Client is a highly secure endpoint and takes advantage of the latest PCoIP protocol features and improved PCoIP Ultra performance. Trusted Zero Clients have the ability to connect to HP Anyware, Amazon Workspaces, and Blast support for Omnisca Horizon platforms so you're never locked into a single digital workspaces solution.

Deployment options

Each individual Trusted Zero Client shipped comes with the first year of Anyware Trust Center, a subscription that enables enhanced Anyware Trust Center features, allows zero client firmware to be updated, and support from HP. Renewal required after initial year.

How to buy

Trusted Zero Clients are available for purchase in various form factors through a wide array of OEMs partners.
